

***Tuesday, 6<sup>th</sup> May 2014***  
***11.00am -12.00 midday***  
***Wallace Wurth LG02 (Medical Sciences Seminar Room)***

***Presentation by:***

Professor Adrian Hill, DPhil  
Co-Director, Oxford Martin Programme on Vaccines  
Professor of Human Genetics

***On:***

**“Towards a multi-stage multi-antigen malaria vaccine”**

Hosted by: Professor Miles Davenport, UNSW Australia, Centre for Vascular Research  
Head, Complex Systems in Biology Group  
Email: [M.Davenport@unsw.edu.au](mailto:M.Davenport@unsw.edu.au)  
Phone: 02 93852762

**Research Overview:**

Dr Hill's immunogenetics programme currently focuses on genome-wide association studies of bacterial diseases, particularly tuberculosis and pneumococcal disease, and he is a participant in the Wellcome Trust case-control consortium that aims to identify new susceptibility genes using large scale approaches.
